EDUCATION

National University of Singapore — B.Comp (Computer Science), Expected 2027
GPA: 4.6/5.0 | Relevant coursework: Data Structures & Algorithms, Databases, Operating Systems

TARGET ROLE

Software Engineering Intern

EXPERIENCE

Teaching Assistant, Intro to Programming — NUS School of Computing (Aug 2025 – Present)

- Held weekly office hours for 60+ students, improving average assignment pass rate from 72% to 89% after introducing a shared debugging checklist.
- Graded and gave written feedback on 400+ submissions per semester, cutting grading turnaround from 2 weeks to 4 days by writing an auto-grading script.

Freelance Web Developer (Jan 2025 – May 2025)

- Delivered a booking site for a local tuition centre, reducing manual scheduling calls by roughly 80% and handling 200+ bookings per month.
- Integrated Stripe payments and deployed on Vercel with 99.9% uptime over 4 months.

PROJECTS

StudySync — Full-stack study group matcher (React, Node.js, PostgreSQL)

- Built and shipped to 300+ NUS students; matched study groups based on module and availability, cutting average time-to-find-a-group from ~3 days to same-day.
- Wrote integration tests covering 85% of backend routes; set up CI with GitHub Actions.

Campus Bus ETA Predictor (Python, scikit-learn)

- Trained a regression model on 6 months of GPS ping data to predict shuttle arrival times within ± 90 seconds, an improvement over the university's static schedule.
- Presented findings at the NUS Datathon, placing top 5 out of 42 teams.

SKILLS

Languages: Python, JavaScript/TypeScript, Java, SQL
Frameworks/Tools: React, Node.js, Express, PostgreSQL, Docker, Git, GitHub Actions, AWS (EC2, S3)

AWARDS

- 2nd Place, NUS Hack&Roll 2026 (out of 80 teams)
- Dean's List, AY2025/26
